PriceWatch

Competitor price monitoring

Know every time a competitor changes their price.

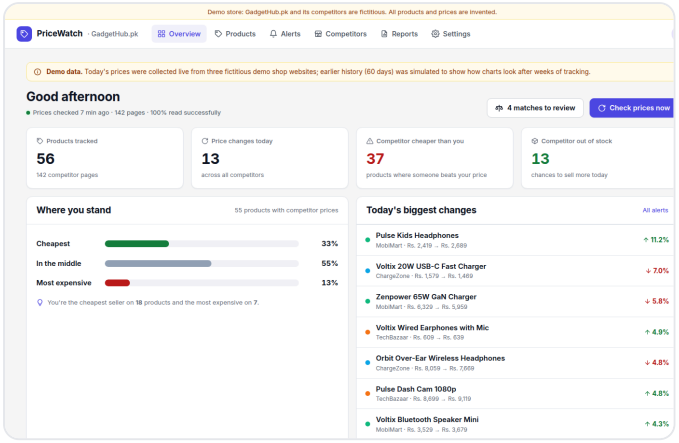

Competitor prices and stock are checked every morning, compared with yours, and summarised in one short report. No more checking websites by hand.

THE PROBLEM

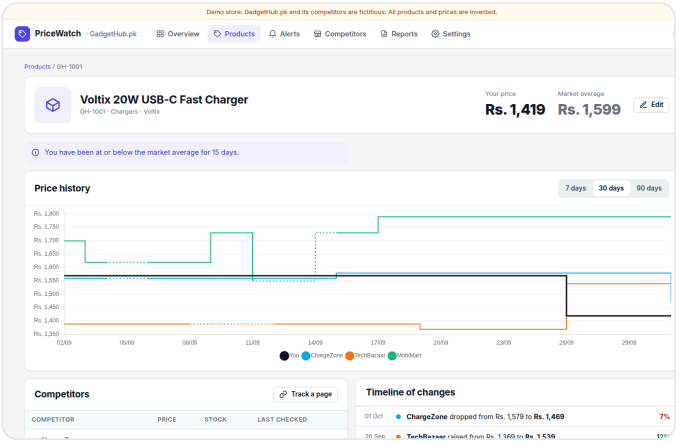

Online stores check competitor websites by hand: hundreds of pages, hours every week. Price cuts are noticed late, competitor stock-outs (chances to sell more) are missed.

THE SOLUTION

- Daily check of every competitor page you choose
- Your price vs. theirs, colour-coded, with full history
- Alerts by email, WhatsApp or Telegram
- Morning report + weekly summary (PDF & Excel)

Overview: where you stand and today's biggest changes.

Price history and a timeline of every change.

MEASURED ON THE DEMO STORE

142/142
live prices read exactly right

100%
pages read successfully

91
price changes caught in one week

~12 h
of manual checking saved weekly

Fictitious store and competitor websites; today's prices collected live, earlier history simulated. Your free sample measures the same on your products.

GENTLE & TRANSPARENT

Only public product pages, once a day, slowly, respecting robots.txt. A data-health page shows how reliably each site was read.

PLANS

Starter (50 products) · Business (500 products, alerts, team) · Enterprise. Setup fee plus monthly subscription.

Free 2-week sample on 20 of your products
Get the morning report every day and decide after.
